

PRODUCT STEWARDSHIP POLICY

PolyOne Corporation conducts business in a manner that ensures compliance with applicable regulatory requirements and industry standards and acts in a responsible manner to protect our employees, customers and the communities in which we operate.

It is the responsibility of every associate at PolyOne to practice responsible and ethical product stewardship on a daily basis. As a member of the American Chemistry Council, we have adopted Responsible Care® Guiding Principles and the Product Safety Code of Management Practices to guide our efforts in continuous improvement in product safety and stewardship.

We will actively seek to use and develop new and modified raw materials and products integrating environmental, health and safety performance into the product design. PolyOne promotes safe handling of raw materials and products throughout manufacturing, transportation, storage, end-use, recycling and eventual disposal. It is PolyOne's expectation that our stakeholders be equally committed to product safety and stewardship.

Sustainable management of our products demonstrates our commitment to human health and the environment, while maintaining customer confidence in PolyOne materials.

A handwritten signature in blue ink that reads "Bob Patterson".

Bob Patterson
President and Chief Executive Officer
