PolyOne™

SAFETY & HEALTH POLICY

PolyOne Corporation believes safety and health are the highest corporate priorities. It is our policy to conduct business in a manner that ensures the safety and health of employees, customers and the communities in which we operate.

PolyOne will be the leader in safety and health by setting aggressive goals, measuring performance and making adjustments when necessary. As a member of the American Chemistry Council, we have adopted Responsible Care® Guiding Principles and the Process Safety Code of Management Practices to guide our efforts in continuous improvement in safety performance.

As a condition of employment, we expect and require each of our associates to work safely at all times, identifying opportunities for improvement, and making safe decisions in their work. We must share the philosophy that every injury is preventable. It is PolyOne's expectation that our stakeholders be equally committed to operating in a safe manner.

It is the responsibility of each person at PolyOne to give the highest priority to safety and health both on and off the job. Commitment, attitude and behavior are the most important factors in preventing injuries and illnesses and preserving health, and our practices reinforce these imperatives. Our commitment to excellence in safety and health is absolute.
